

DIVERTER VALVE DYDP

For Granular Product

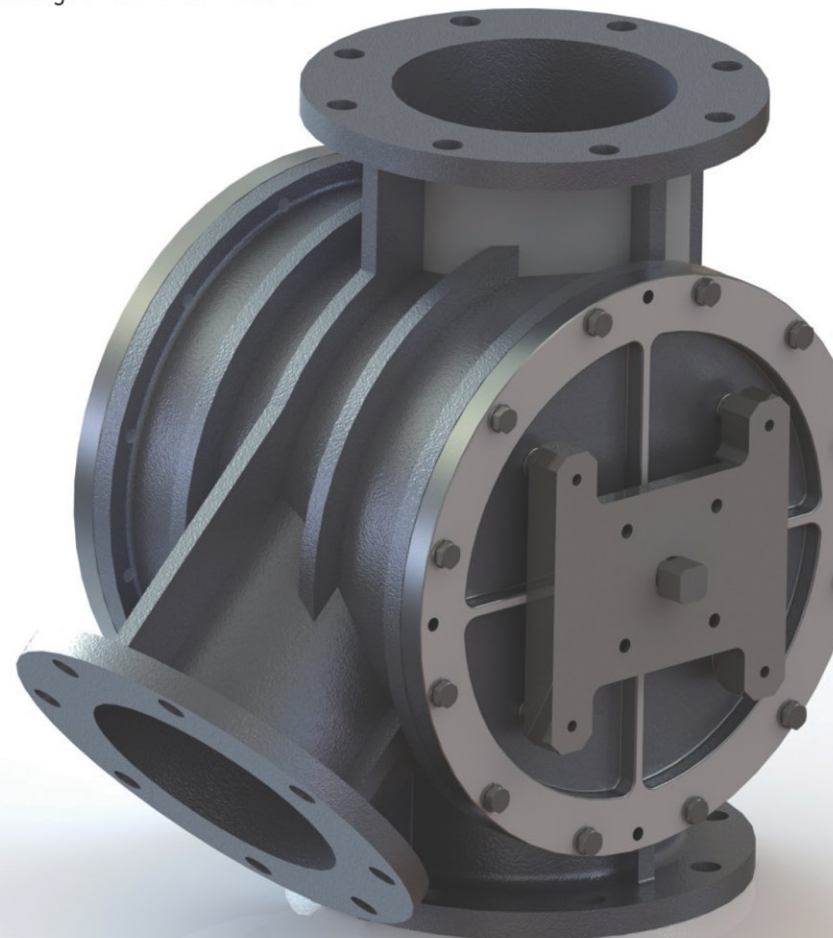

DYP&F have been designing and suppling rotary valves, diverter valves and other related components for the bulk soilds handling industry for more than 20 year.

APPLICATION

- Suitable for pellet products
- Using for diverting the bulk material flow in pneumatic conveying system

PRODUCT INFORMATION

- Heavy-Duty, casted body
- Flange Connections : ANSI 150# (Or DIN10/JIS 5k/10k available)
- Manual or pneumatic operation
- Precise design with no ledges or dead spots between plug and body
- Teflon seal rings at eact nozzle
- Indicator checks the orientation of plug
- Maximum differential pressure up to 3bar(g)
- Temperature range : -20 °C to + 100 °C
